AVAIL TREATMENT FROM HOME

WHAT IS PCOD?

A hormonal disorder causing enlarged ovaries with small cysts on the outer edges. PCOD affects more than 1 million cases per year (India)

Requires a medical diagnosis

Chronic: can last for years or be lifelong

Treatment can help, but this condition can't be cured

The cause of polycystic ovary syndrome isn't well understood, but may involve a combination of genetic and environmental factors.

Symptoms include menstrual irregularity, excess facial hair growth, acne, hairloss, difficulty losing weight or rapid weight gain and trouble getting pregnant.

50% OF WOMAN WITH PCOD WILL HAVE DIABETES OR PRE-DIABETES BEFORE THE AGE OF 40

70% OF WOMAN WHO HAVE PCOD AND HAVE NOT HAD IT PROPERLY DIAGNOSED

50% APPROXIMATELY 50% OF WOMEN WITH PCOD SUFFER FROM OBESITY
